heating  
cost  
savings

## BEFORE

- 2 systems of 2 heat exchangers and 480 gallons of storage providing domestic hot water for 75 units each.
- 2 five million BTU boilers were used to heat the building and provide domestic water during wintertime. Only one five million BTU boiler was used during summertime for domestic hot water purposes.

## NOW

- 2 systems of 2 TURBOMAX™ 109 water heaters providing domestic hot water for 75 units each.
- Each system has a natural gas boiler (2 stages) of a net output of 720 MBH.
- The 2 five million BTU boilers are used only during winter to heat the building.

*When every drop of hot water counts...*
